

VIC | TAS | SA ROOFING AND WALL CLADDING

CORRUGATED ROOF AND WALL CLADDING

- Lightweight and easy to handle
- Cost-effective to use and quick to install
- 5 degree minimum roof pitch to suit most traditional applications
(Also available in *Bullnosing and Curving*)

MONOCLAD® ROOF AND WALL CLADDING

- 29mm ribs provide excellent spanning and water-carrying capacity
- Stramit Monolap® lap joint system allows for single plane, long run roofs
- Suitable for 2 degree minimum roof pitch

STRAMIT LONGSPAN® ROOF AND WALL CLADDING

- Cost-effective to use and easy to install
- Architectural flexibility for curved roofs and roof pitches as low as 3 degrees
- Variable fixing screw patterns give design flexibility

SPEED DECK ULTRA® CONCEALED FIXED DECKING

- Outstanding wind load resistance and water-carrying capacity
- Suitable for roof pitches as low as 1 degree
- Stramit FarLap® roof lap joint system is the ideal solution for long run roofing

SPEED DECK® 500 CONCEALED FIXED DECKING

- Supplied exclusively to Tasmania
- Concealed clips for enhanced security and appearance
- Suitable for roof pitches as low as 1 degree

MONOPANEL® WALL CLADDING

- Durable system of interlocking panels with fully concealed fasteners
- Suitable for horizontal and vertical applications.
- Available in an extensive range of colours

K-PANEL® WALL SHEETING

- Wide cover makes cost-effective to use
- Quick to install with simple conventional fastening
- Lower profile facilitates smaller flashings for small projects

MINI CORRY® PANELLING

- Small rib size visually complements Stramit® Corrugated roof sheeting
- Conventional fixing for quick installation and seamless finish
- Roll formed to deliver consistent profile and lengths made to order

STRAMIT MINIRIB® PANELLING

- Ideal for internal wall linings, fascias, eaves, transport siding and transportable buildings
- Conventional fixing makes it quick to install
- Stramit's widest cover cladding.
